

ALEKSANDR OVCHINNIKOV

Batumi, Georgia — Open to Relocation / Remote · ovchinnikov.lxs@gmail.com · [LinkedIn](#) · [Github](#) · [Portfolio](#)

Frontend Engineer with 5+ years of experience. Continuously applying new technologies in practice. Focused on cross-functional growth and applying architectural patterns only when aligned with the project's scope, deadlines, and future scalability.

PROFESSIONAL EXPERIENCE

[Wintech](#), Remote

2023 – Present

Frontend Engineer (Deputy Head of Frontend)

- Migrated platform from Nuxt 2 to Nuxt 3 using Nuxt layers to support multiple visual variants and a core layer for shared business logic, enabling feature reuse across all platform projects.
- Improved website performance by 2.5x through hybrid rendering in Nitro server using SWR caching and Redis-based page revalidation, enhancing UX and SEO for critical payloads.
- Redesigned CI/CD to support a single build for all products, where runtime variables are updated per project at server start. This reduced release delivery time from several hours per environment to just 10 minutes (staging/production).
- Built a custom i18n solution instead of nuxt-i18n with support for all essential tools and runtime locale-based page generation using prefix strategy.
- Integrated Strapi CMS to manage project customization configs and developed a React component to convert Tokens Studio JSON into CSS variables with localization and theming support (e.g., fonts, palette per locale).
- Temporarily acted as Head of Frontend: planned and analyzed tasks with managers and heads of other departments, communicated directly with the CTO, hired a team member who successfully passed probation, found a new Head of Frontend, established review and release pipeline processes, and earned the trust of both the team and other departments.
- Onboarded 3 colleagues, enabling the team to deliver a large number of projects in a short time. We defined SMART goals for probation and achieved them collaboratively.

[IdaProject](#), Moscow (Hybrid)

2020 – 2023

Frontend Engineer

- Gained my first valuable professional experience in a strong development team that helped me grow personally and professionally.
- Developed a website builder with 500+ customizable blocks, supporting full control over content, color palettes, UI kits per block, and Backend API data integrations (e.g., real estate layouts, mortgage calculators, booking).
- Created an internal UI styleless library for diverse visual use cases and a development ecosystem to enhance DX — test libraries, linters, and CI/CD templates.
- Built a personal account system with many backend API integrations.

SKILLS

Skills: Javascript, Typescript, Node.js, Vue.js, Nuxt.js, Pinia, Nitro, Nest.js Fastify, PostgreSQL, Supabase, Strapi, Tailwind, Git, ESLint, Stylelint, Prettier, Vite, Webpack, Vitest, Cypress, Token Studio, Figma, Storybook, Gitlab, Github, JsDoc, i18n, PWA, React, Angular, code review, team leadership, web app architecture planning, mentoring.

OTHER

PERSONAL PROJECTS:

- **n3-workspace:** [Github](#) — Nuxt 3 monorepo with modular architecture and shared UI-kit based on nuxt-layers.

- **Currency Converter:** [GitHub](#) — Nuxt 3 test task: SPA for currency conversion.

EDUCATION:

- State Technical University named after twice Hero of the Soviet Union, pilot-cosmonaut A.A. Leonov, Korolev (2017-2020) - **Control and Informatics in Technical Systems**
 - Completed 3 years of university, which helped me understand who I want to become and how to get there.

CERTIFICATE:

- EF SET English Certificate - Level B1 <https://cert.efset.org/ySvAtj>
